HIV/AIDS is a major public health concern and cause of death in many parts of Africa. Although the continent is home to about percent of the world's population, more than two-thirds of the total infected worldwide some 35 million people were Africans, of whom 15 million have already died. Sub-Saharan Africa alone accounted for an estimated 69 percent of all people living with HIV. HIV/AIDS in Africa is one of the most important global public health issues of our time, and perhaps, in the history of mankind. In Africa, AIDS is one of the top causes of death. While only comprising slightly under 15% of the total population of the world, Africans account for nearly 70% of those who live with HIV and are dying of AIDS.

HIV/AIDS is the most serious health concern in South Africa. The country has the fourth-highest adult HIV prevalence rate in the world, according to the United Nations statistics. Currently, however, the precise role of EBV in Burkitt's lymphoma is still being investigated, because the virus is less common in patients outside Africa. In the United States, about 25% of children and 40% of adult AIDS patients with Burkitt's have the Epstein-Barr virus.

Jul 19, Of the publications identified, 13 were included for meeting all of the following inclusion criteria: pertained to the environment, described original research findings, involved patients with HIV/AIDS, location in sub-Saharan Africa, and focused on issues pertaining to rural community life.
