Nikki Chaney, R Nikki Chaney. Actions are the core of the Struts2 framework, as they are for any MVC (Model View Controller) framework. Each URL is mapped to a specific action, which provides the processing logic which is necessary to service the request from the user. But the action also serves in . As mentioned previously, the tag plays the role of a view in the Struts2 MVC framework. The action is responsible for executing the business logic. The next step after executing the business logic is to display the view using the tag.. Often there is some navigation rules attached with the results. I am invoking struts2 action from jquery-ajax, the action method method getting invoked properly but unfortunately the action success page is not getting invoked. The js method is the one I use for.

In Struts 2, youll spend most of your time working with actions. The action class contains business logic, retrieve resource bundle, hold the data, validation, and select the view result page that should send back to .
